

myKP's guide to better wi-fi reception

upgrades upgrade your antenna and/or your radio device. the maximum radio strength you can use in australia is 4Watts (36dBm).

visit <http://myshop.mykp.com.au> for your antenna and radio upgrades.

you can also email one of our support team members for further advice.
support@mykp.com.au

best signal location If you can see the myKP login screen, look at the bottom right of the page. There will be a line of text that states where the best signal is. also visit <http://mykp.com.au/hotspot/locator> to see which areas are being serviced.

metal objects all metallic surfaces will reflect wi-fi signal, this includes mirrors.
